

Smart SFP Custom Product

Do It Yourself

Build your own product based on the industry-leading Smart SFP platform. Your idea, your design, your product.

Software Development Kit (SDK) included:

- Bootloader
- Linux kernel
- Operating System
- FPGA IP cores
- Complete building environment

External and internal attributes of the hardware are fully customizable – labels, MACs, s/n, etc.

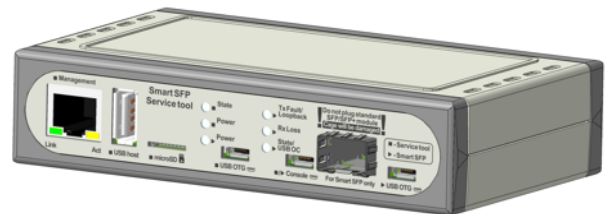

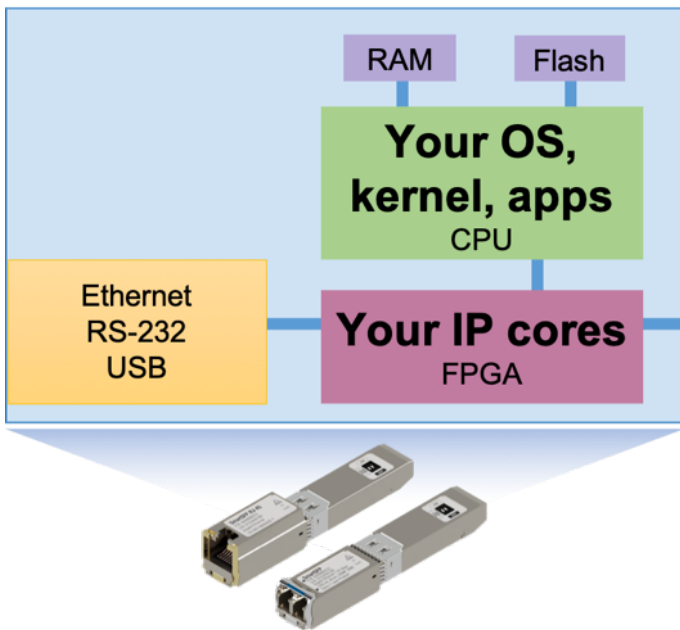

We also offer consulting services to help you bring your product to the market.

Examples of successful projects:

- Video processing
- Protocol converter
- SCADA analyzer
- Another OS distro

Key features:

- 1G / 10G
- FPGA
- ARM
- Linux based OS
- Ethernet, RS-232, USB

Service tool to simplify development process

Ordering information

Models

Intelligent SFP module, ARM CPU, FPGA, Gigabit Ethernet, DDM, 1310 nm, 20 km, 2xSMF, LC

Intelligent SFP module, ARM CPU, FPGA, Gigabit Ethernet, 10/100/1000BASE-T, RJ-45

Feature sets:

Software Development Kit (SDK)
